

Pegasus DataLinks is a highly developed data interface processor designed exclusively for horse racing. This interface system provides accurate, instantaneous, comprehensive wagering information for broadcast and simulcast video graphics displays.

Pegasus DataLinks-**Broadcast**: For live racing television production equips your video department to generate cutting edge, complex graphics easily. Our exceptional formatting options and data conversion tables free your TV crew from tedious, redundant work - providing the tools to help eliminate erroneous data going to air.

Pegasus DataLinks can be made to utilize any data. Any data you subscribe to or data manually entered is accessed and instantly available for graphics screens. This includes track commentators, media departments and handicappers comments, as well as the standard tote and program data. It also incorporates jockey photos, saddle colors, timer systems and more.

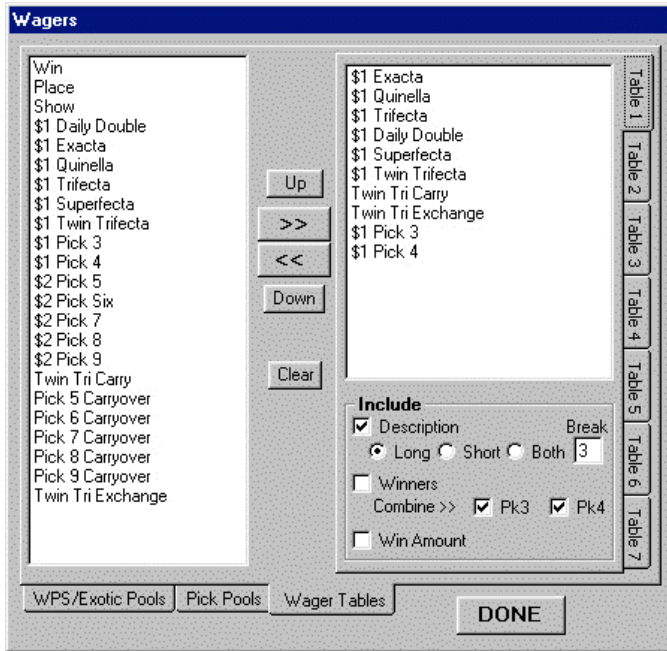

This program can easily replace any out-dated software and interfaces with the Chyron Infinite family of cg's, Codi systems and Pinnacle Systems Deko series of cg's.

Beautiful custom graphics, backgrounds and logos are available, or you can use your own. Pegasus DataLinks processors are modem accessible for fast updates, modifications, customization and support.

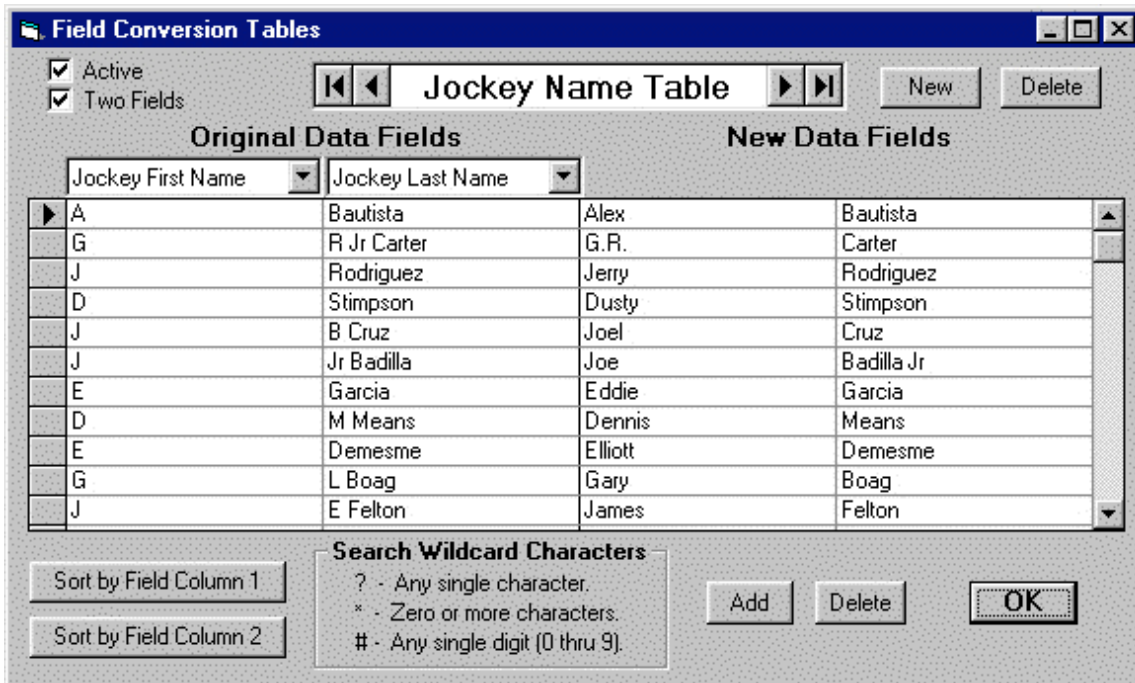

Results: This screen shows race results and is used to send the selected results to your screens. Pages may be set-up to read when sent to the cg as results are in from tote, or are recorded for later manual recall. Background pages can be automatically sent to an extended frame buffer or 2nd channel and read

simultaneously. Any race results may be selected and utilized without interruption of current race data.

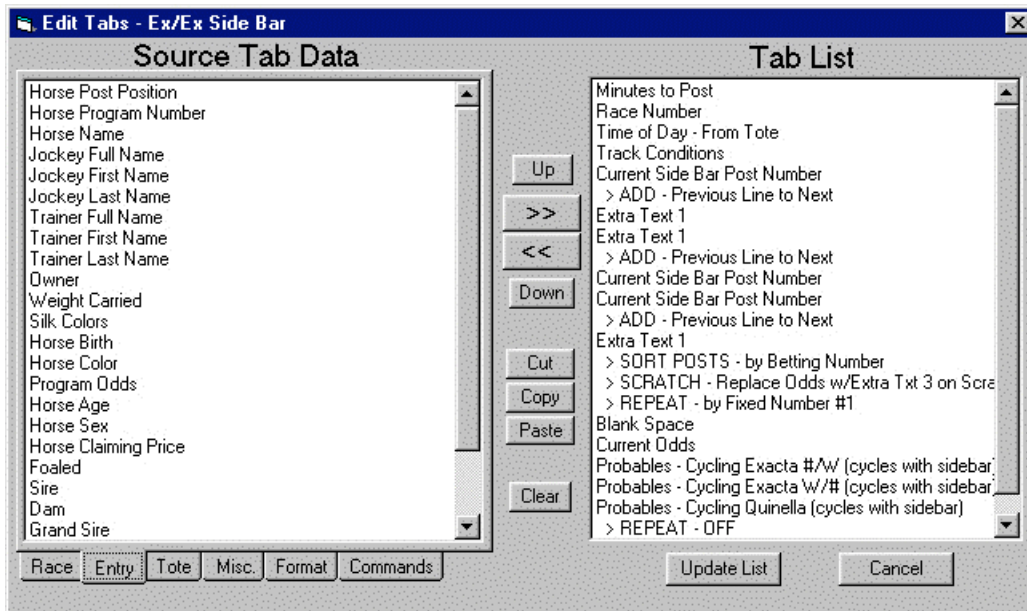

Wager Tables: Used to select groups of wagers to be use on any page (i.e. All probable wagers can be selected for one page and all pick wagers for another page). Also, descriptions can be edited for each wagers title, the amount of the wagers can be modified from tote prices (i.e. tote sends a \$1 price and the

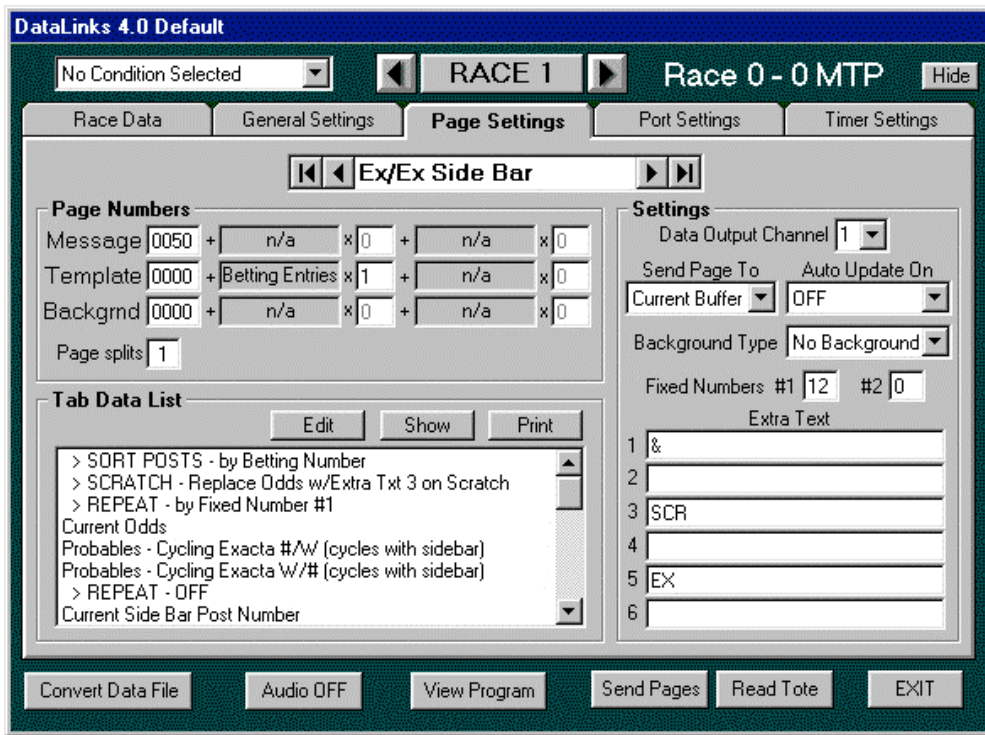

TV production needs to display \$2 prices).

Race Data: All source data can be view and edited on this screen. Columns can be sorted in any order by the race or with all races showing. This screen also includes a quick list of all the day's jockeys for quick jockey changes.

Page Settings: Used to set up data for graphics pages. Messages, templates and background page numbers can be selected for each page, also page numbers can be set based on race number, post number, posts in race, betting entries, page splits, custom fixed number, timer poles and entries in a wager list. Pages can be sent immediately to the active chyron screen, directly to the chyron hard drive or a second buffer display.

Typical video wall layout for simulcast wagering displays

Pegasus DataLinks-Simulcast: This program processes tote data for video graphics displays of simulcast wagering information for in-house patrons. Generates multiple video outputs of selectable sequencing screen options, including but not limited to:

- Exotic probables and will pays - shows exacta, quinella, daily double, dd will-pay, pick 3
- Win place show pools and pool totals - ex qu dd pool totals
- Exacta grid
- Quinella grid
- Results
- Progressive win odds
- Win place show probables - shows aprox win amount for ea horse with high & low payoff
- Details
- Changes
- Claims
- Information

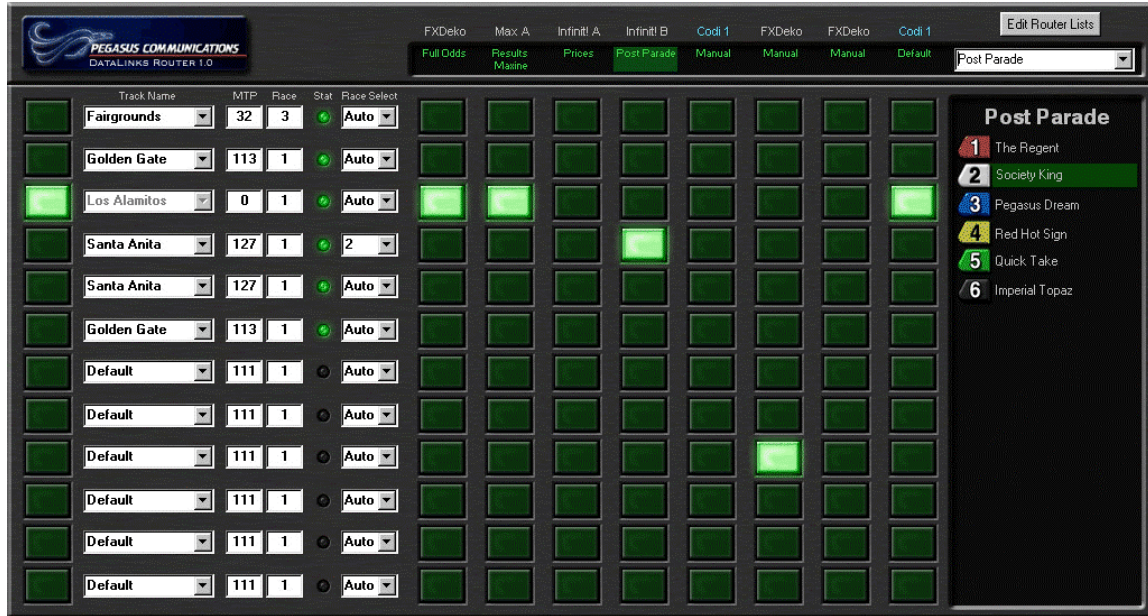

Pegasus DataLinks Sports-Ticker is a newly added and popular option for use with both the broadcast or simulcast systems. This feature adds current national sports scores to screens so patrons wont need to look elsewhere. Data is provided by subscription.

Pegasus DataLinks-Race Network Router

This screen is your control center for multiple graphics generators. It manages multiple racetrack tote feeds and program data. The router provides all the capabilities of DataLinks broadcast for all your signals at the same time. PDL-router will run multiple sidebars on unmanned CG's while sending results, post parades, grids, anything you have as you need it to as many CG's as necessary. You can choose to have graphics stored on the CG drive and read your pages, or can call them up from this screen. It's HUGE.

Pegasus DataLinks-Tracks

The PDL-tracks software works together with electronic timing hardware to turn out the new horse racing industry standard. This timer gives accurate fractions for all breeds, all surfaces, all conditions as we are able to use our standard electric eyes, coaxial electric or wireless electric eyes.

Built in bird elimination! A trigger delay can be set that allows momentary breaking of the beam to be ignored which is common with birds on a turf track.

If an eye is out of alignment at the time the system arms the up-coming eye, and the beam is already broken, instead of stopping and giving the wrong time the timer produces an audible signal to let the operator know to take over the triggering for that electric eye manually. There are many thoughtful details like this born of experience built in to the PDL-Tracks system.

The operating screen is simple to use, your patrol judge, photo finish operator or clocker will set up for the race card and easily reset if falsely triggered.

Pegasus DataLinks valued customers include:
 Los Alamitos Race Course ♦ Hollywood Park ♦ Golden Gate Fields ♦ Bay Meadows ♦ Cal Expo ♦
 California Fairs ♦ HRTV ♦ TVG ♦ TRN HPiTV Woodbine Entertainment ♦ Northfield Park ♦ Meadowlands
 Wyvern International ♦ Del Mar Thoroughbred Club ♦ SCOTWINC ♦ Santa Anita Park ♦ Keenland
